

GRASSLAND HEALTH & TREE CARE SEMINAR

July 24th in McIntosh at City Hall

July 25th in Timber Lake at St. Joseph's Center

KAYLEE WHEELER
Range Field Specialist
SDSU Extension

DR. JOHN BALL
Forestry Specialist
SDSU Extension

Grassland Health with Kaylee Wheeler

Rangelands encompass more than just grass—they're habitats for grasses, forbs, shrubs, insects, wildlife, and livestock. Kaylee will highlight the importance of native plants and wildflowers for grazing livestock and their impact on landscape health. Gain insights into enhanced grazing plans and personalized mineral mixes, while exploring how these plants contribute to grazing livestock nutrition and the overall well-being of rangelands.

Tree Care with Dr. John Ball

Dr. John Ball, an expert in tree diagnostics, will address common issues faced by South Dakota trees. Learn about the best species for your land, common misconceptions, and care practices to reduce tree loss. Bring your questions for the Q&A session!

AGENDA

- 9:30 AM: Registration begins
- 10:00 AM: First speaker: Kaylee Wheeler
- 12:00 PM: Lunch provided by Red Earth Table
- 1:00 PM: Second Speaker: Dr. John Ball

RSVP BY JULY 19TH TO ANNIE
