

HALF-DAY

PASTURE WALK

July 10, 2026 | Midland, SD

Where Experience Meets Innovation

Overview

See firsthand how an underperforming hay field was transformed into a managed grazing system, and learn practical strategies that can be applied to operations of any size.

- Comparison of paddocks with 30–45 days of recovery and recently grazed areas
- Demonstration of plant recovery and the power of rest as a management tool
- A young producer and experienced landowner working together to improve the operation
- New fencing and water infrastructure supported by the U.S. Fish & Wildlife Service Partners Program
- Practical ideas for improving pasture productivity and soil health
- Plenty of opportunities for discussion, questions, and peer-to-peer learning

JULY 10
9:00-1:00 CDT

DOUD RANCH

23766 SD HWY 34
Midland, SD
(At the intersection of
hwy 34 and Manilla Rd.)
